

## N, N, N', N'-TETRAKIS(2-HYDROXYETHYL)ADIPAMIDE

### GENERAL DESCRIPTION

Product:	N, N, N', N'-Tetrakis(2-hydroxyethyl)adipamide
Synonyms:	N,N,N',N'-Tetrakis(2-hydroxyethyl)hexanediamide Bis(N,N'-di-ethylhydroxy)adipoyl amide
CAS Number:	6334-25-4
EC Number:	405-370-0
Molecular Formula:	C <sub>14</sub> H <sub>28</sub> N <sub>2</sub> O <sub>6</sub>
Molecular Weight:	320.38

### SALES SPECIFICATION

Appearance:	white crystalline powder
Purity:	98% min
Packing:	on request

### PHYSICAL PROPERTIES

Odor:	amine-like
pH (500 g/dm <sup>3</sup> water):	9,5 at 20 °C
Melting point:	120-124 °C
Specific Gravity/Density:	1.239 g/cm <sup>3</sup>
Partition Coefficient (n-octanol/water):	-2.50

### USE

Can be used as curing agent for polyester powder coatings, lower toxicity than triglycidylisocyanurate (TGIC).

### CLASSIFICATION

Not a dangerous substance according to GHS.

This substance is not classified as dangerous according to Directive 67/548/EEC.
